

Risk Profile Description

The portfolio aims to have 20% exposure to equity and property assets and 80% exposure to Fixed Interest securities. Over the medium to longer term, the 20% exposure to risks and expected rewards of equity ownership is balanced by a 80% allocation to high-quality bonds and investment grade, which together should help to deliver moderate, inflation-plus returns. The equity exposure is invested in both UK equities and overseas equity in both developed and emerging markets.

Portfolio Comments

As the Tempo portfolios are constructed using a combination of index-tracking and multi-factor funds, the monthly portfolio movements are best summarized using the following summary.

July saw volatility return to global markets albeit not to the levels that were seen in March and April. The world has continued to ease lockdown restrictions and global travel started to pick up at the start of the month. As we have moved through July, infection numbers in certain regions have started to increase. In Europe, Spain has seen the greatest increase with the UK government implementing travel restrictions on all but essential travel. The USA has also seen a continued increase in cases in many states, which looks to hamper the reopening of the largest economy. This has translated into higher volatility in markets as the concerns of a second wave increases.

Economic data has shown that the slowdown in the global economy is the fastest since WW2 with US GDP falling 32.9% in the second quarter. Europe also had a large hit to GDP with a 12.1% decline in the Eurozone, with Spain being the hardest hit economy seeing a 18.5% decline.

In equity markets, the US has continued to outperform Europe with the S&P 500 up 5.51% over the month compared to the UK FTSE 100 which was down -3.86%. This was down to large technology stocks continuing to perform strongly with more cyclical sectors underperforming as they have been more affected by the pandemic. Chinese markets rallied in July despite the virus and emerging market currencies rallied on the back of a weaker US\$. This helped emerging market equities increase by 2%.

Government bonds continued to perform well as central banks indicated interest rates will stay lower for longer and more central bank stimulus was announced in Europe. The 10 year Gilt Yield fell from 0.2% at the start of July to 0.1% by the end of July, with similar moves seen across global bonds.

The style box shows the Tempo portfolio's exposure to value companies and size of companies. The portfolio has a higher proportion of its assets in value companies, however it has holdings across the broad spectrum of the market.

The information contained within this document is subject to the UK regulatory regime and is therefore primarily targeted at consumers based in the UK. The value of investments and income from them is not guaranteed, can fall, and you may get back less than you invested. Your capital is therefore always at risk. Past performance is not a guide to future performance. If you invest in currencies other than your own, fluctuations in currency value will mean that the value of your investment will move independently of the underlying asset. Any specific investments mentioned are for illustrative purposes only and this is not intended as investment advice. If you are unsure as to the suitability of any investment or service, please contact a professional adviser or Progeny Asset Management to discuss. The data in the performance metrics table is based on historical performance and is not indicative of future performance which could be better or worse than what is shown. The data contained in this profile is based on portfolio simulation and does not represent the actual portfolio. It is intended to provide an indication of the magnitude and direction of historic returns from a hypothetical portfolio made up of asset class market indices held in comparable proportions to those within the Tempo 20 portfolio.

Progeny is a trading style of Progeny Asset Management Limited and is used by various companies within the Progeny group of companies. Progeny Asset Management Limited is a limited company registered in England and Wales with number 09415365. The company's registered address is 1A Tower Square, Leeds, LS1 4DL. Progeny Asset Management Limited is authorised and regulated by the Financial Conduct Authority (No. 740528).
