

## CONNECTED FINANCIAL THINKING

## Investment Policy

This Sub-fund provides exposure to shares that can vary between 70% and 90%. Exposure to shares may be to any economic sector or geographical area. It is expected under normal circumstances that UK shares (defined as domiciled, incorporated or carrying out a significant part of their business in the UK) will represent a greater proportion of the shares than the UK stock market's proportion of the global stock market (e.g. FTSE World).

The Sub-fund may also provide exposure to alternative asset classes, such as property and commodities, which are intended to improve the overall risk reward profile of the Sub-fund. Exposure to alternative asset classes will be limited to 30%.

The balance of exposure will be to bonds (which may include government, corporate, sub-investment grade and inflation linked) and cash.

Exposure to bonds may be to any economic sector or geographical area. It is expected under normal circumstances that the majority of exposure will be held in UK bonds or in bonds where the currency exposure is hedged to GBP (reducing currency risk for a UK based investor). Exposure will be based on long term expectations and may change without notice.

To provide the above exposure, a minimum of 70% of the Sub-fund will be invested in active and/or passively managed collective investment schemes (which may include schemes operated by the ACD, associates or controllers of the ACD). The Sub-fund may also invest directly (maximum of 30%) in transferable securities, such as shares, bonds, investment trusts or structured products.

## Sector Allocation

## Objective

The objective of the Sub-fund is to provide capital growth, with the potential for income, over any 6-year period.

## Performance

The IA (Investment Association) 40-85% Share Sector can be used as a comparator. The sector is considered appropriate for investors to use when comparing performance, as the asset allocation of Sub-fund is similar to the asset allocation of other funds in this sector. The sector is not constructed as an index, therefore as funds enter or leave the sector the composition can change.

| Cumulative Performance            | 3 Months | 6 Months | 1 Year | 3 Years | 5 Years | 10 Years |
