

Key investor information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

MGTS Progeny ProFolio Global 50-70% Shares Fund Acc (GB00BQC4KW38)

The Sub-fund is managed by Margetts Fund Management Limited.

Objective and Investment Policy

Investment Objective

The objective of the Sub-fund is to provide capital growth, with the potential for income, over any 5-year period.

How will the objective be achieved?

The Sub-fund is a global portfolio which provides exposure to a range of asset classes across any economic sector and geographic area with exposure to shares that can vary between 50% and 70%. The Sub-fund may also provide exposure to alternative asset classes, such as property and commodities, which are intended to improve the overall risk reward profile of the Sub-fund. Exposure to alternative asset classes will be limited to 30%.

The balance of exposure will be to bonds (which may include government, corporate, sub-investment grade and inflation linked) and cash. Exposure to cash will vary depending upon prevailing circumstances and although it would normally not exceed 10% of the total value of the Sub-fund, there may be times when a higher level of liquidity may be maintained. Unless market conditions were deemed unusually risky, the increased exposure and period would not be expected to exceed 30% and six months respectively.

To provide the above exposure, a minimum of 70% of the Sub-fund will be invested in active and/or passively managed collective investment schemes (which may include schemes operated by the ACD, associates or controllers of the ACD). The Sub-fund may also invest directly (maximum of 30%) in transferable securities, such as shares, bonds, investment trusts or structured products.

In providing the above exposure the Sub-fund may hold a mixture of investment strategies that are selected to help reduce volatility or improve returns in normal markets, such as funds of structured products.

Management Style

The Sub-fund is actively managed, meaning that the manager selects investments, rather than tracking a stock exchange or index.

Derivative Use

The use of derivatives and/or hedging transactions are permitted in connection with the efficient portfolio management (managing the Sub-fund in a way that is designed to reduce risk or cost and/or generate extra income or growth or both). The Sub-fund may hold assets which embed derivatives that are used for investment purposes and efficient portfolio management, although this would not materially affect the risk exposure of the Sub-fund.

General

Shares in the Sub-fund can be bought and sold daily (every Business Day of the Sub-fund). If you invest in income shares, income from investments in the Sub-fund will be paid out to you. If you invest in accumulation shares, income will be retained in the value of your shares.

Recommendation: this Sub-fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and Reward Profile

The risk and reward score is not guaranteed and may change over time. The lowest category does not mean risk free.

The Sub-fund is in this category due to the nature of its investments and previous levels of volatility (how much the value of the Sub-fund rises and falls). The risk and reward score is based on past performance and calculated in accordance with European legislation. It may not be a reliable indication of the future risk profile.

The following risk factors are relevant to the overall risk profile of the Sub-fund. A full description of risk warnings is provided in the prospectus, which is available on our website, or by requesting a copy.

Structured products may have features that alter the returns from an underlying basket of assets (typically equity indices – e.g. FTSE 100), with the objective of delivering returns within a defined range as a result of foregoing higher growth and protecting from falls in

value. It is important that investors are aware that at times this range may not be achieved, in which case the structure may provide a loss that will be similar to investing directly in the underlying asset. The value may also be affected by the issuer credit rating and they may be less liquid than other investments.

Exposure to various asset classes may include some assets that are considered to carry more risk. This means that the rise and fall in value could be greater than for lower risk investments, or that they may take longer to sell. In addition, the way in which these assets interact with each other may change through time causing higher or lower fluctuations of value.

Investments in collective investment schemes may provide a higher level of diversification but may also increase costs. The underlying collective investment schemes may also experience operational or credit issues which could impact liquidity (the ability to sell) or capital value.

There may be a significant exposure to cash or money markets. If investment markets generally rose during this period, against expectation, then returns would be reduced.

The objective, policy and strategy set out above should align with the objectives of the investors and their minimum timeframe for investment.

Charges

The charges you pay are used to pay the costs of running the Sub-fund, including the costs of marketing and distribution. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	0.00%
Exit Charge	0.00%

Charges taken from the Sub-fund over a year	
Ongoing Charges	0.90%
Performance Fee	0.00%

The entry and exit charges shown are the maximum figures. In some cases you might pay less – you can find this out from your financial adviser.

The ongoing charges figure is based on the last year's expenses (or reasonable estimate where Sub-fund has not been operating for a full calendar year), for the year to 31 Dec 2024 and this figure may vary, year to year. It excludes portfolio transaction costs.

For further details on the calculation of the charges please refer to the Sub-fund's prospectus.

Past Performance

Past performance is not a reliable guide to future performance.

The past performance shown here takes account of all charges and costs except entry and exit charges and it is inclusive of net reinvested income.

The Sub-fund was launched on 15 May 2023.

The share class was launched on 15 May 2023.

The performance is calculated in pounds sterling.
