

Tempo MPS Portfolios

An evidenced based, multi-factor total returns portfolio

Progeny Asset Management Ltd is authorised and regulated by the Financial Conduct Authority.

This document is directed at professional advisers and should not be relied upon by retail investors. The value of investments, and the income from them, may fall or rise and investors may get back less than they invested.

progeny Asset Management

Why should you consider our Tempo portfolio service?

“

An evidence-based, multi-factor portfolio range ideal for clients who want a low-cost solution set to an asset allocation that progressively increases the factors of risk and returns.

”

Progeny Asset Management (PAM) are an award winning team that have been building portfolios and models together for over a decade.

Tempo is an evidence-based, total return MPS portfolio range designed using a systematic discipline. It combines a passive and multi-factor approach, whilst staying true to the empirical evidence of weightings towards small-cap and value. Its name refers to the metric that sets how a piece of music should be played. Like in a musical score, the tempo defines the pace of performance. At the lowest tempo, the rhythm is slower, at the highest tempo it's livelier and more active. Each portfolio in our range is set to an asset allocation that progressively increases the factors of risk and returns.

Our portfolios are structured using academic research and the long-term observation of markets and how they work.

What we do for you

We're here to show that there's a better way to invest and make the most of balancing risk and return.

All our solutions are designed for clients who want to hand over the day-to-day management of their investments. We work alongside advisers to choose the right portfolios and services that are matched to suitability.

Our experienced team understand the importance of bringing professionals together to achieve the best outcomes and have used this to create products with a focus on performance and costs.

The Tempo service is a fund of funds solution. It is made up of MGMTS Progeny Systematic Bond and MGMTS Progeny Systematic Equity Funds. Matched using our selected risk profiling tool our solutions ensure the most appropriate portfolio is chosen to meet investors objectives, considering capacity to suffer losses and financial goals.

Our portfolios are a managed portfolio service (MPS). This brochure will help explain the objectives, processes and differences between the Tempo Portfolio range that is composed of eleven investment solutions.

What it is

- ✓ Multi-discipline approach to fund allocation
- ✓ Facts and figures-based
- ✓ Systematic approach to asset allocation
- ✓ Competitively priced

What it is not

- ✗ A closet tracker
- ✗ Passive
- ✗ A faceless service
- ✗ Emotion-led fund picking

Investment Philosophy and Beliefs:

Our five principles for investing

Principle 1: Get the asset mix right

We start with getting the asset apportionment fine-tuned across our funds. The choice and adherence to our long-term investment policy and asset allocation, is the core driver of portfolio returns and therefore risk. Choosing the right mix, over the right time and for the right risk appetite, is the best means to deliver expected returns.

Principle 2: Diversify broadly

The next important step is to ensure that an investor is not overly exposed to one sector/fund/geography because the only certainty in financial markets is their uncertainty. Taking an approach that doesn't chase trends means investors take advantage, wherever they can, of the diversification benefits on offer. We believe that owning a well-diversified portfolio is critical to long term portfolio success and is a method of taking an element of control over market changes that are essentially uncontrollable, such as natural disasters, wars, political changes etc.

Principle 3: Manage financial costs

Investors are often unaware of the effects ongoing and compounding fees have on returns and the severe deductions over the long-term. These include the effects of inflation on purchasing power; the cost of tax; and the significant 'all-in' cost of investing (e.g. ongoing charges and turnover costs). Controlling costs within the fund has significant benefits, especially given the multiplying effects over the life-time of an investment.

Principle 4: Control emotions

Behavioural finance studies have revealed that investors suffer a number of wealth damaging psychological preconceptions and biases.

The emotional impacts of regret, pride, greed and panic tend to result in trying to guess market timing and the excessive taking or avoidance of risk. Poor investment behaviour is likely to have a negative effect on investment returns. We take the emotion out and base decisions on quantitative analysis rather than making behavioural choices.

Principle 5: Rebalance the portfolio

Rebalancing is where a portfolio is brought back to its originally designed asset allocation when market performance has caused it to change. The purpose of rebalancing is to control risk, and to ensure that investors are not exposed to more risk than they agreed. Rebalancing can be achieved either by buying and selling funds, or by directing new money into the right asset to achieve the original balance.

progeny Asset Management

**Progeny Asset Management
is independent and impartial;
we are not tied to
any fund manager, bank or
insurance company.**

Progeny Asset Management deliver an investment proposition that is genuinely unbiased across a broad range of solutions.

These are built on the foundations of our Investment Principles. Using these building blocks, we're able to offer clients a wide range of investment strategies which are risk-rated, and provide a style-agnostic approach.

Our Investment Committee is an expert panel of investment professionals who set the strategic approach we take to investing.

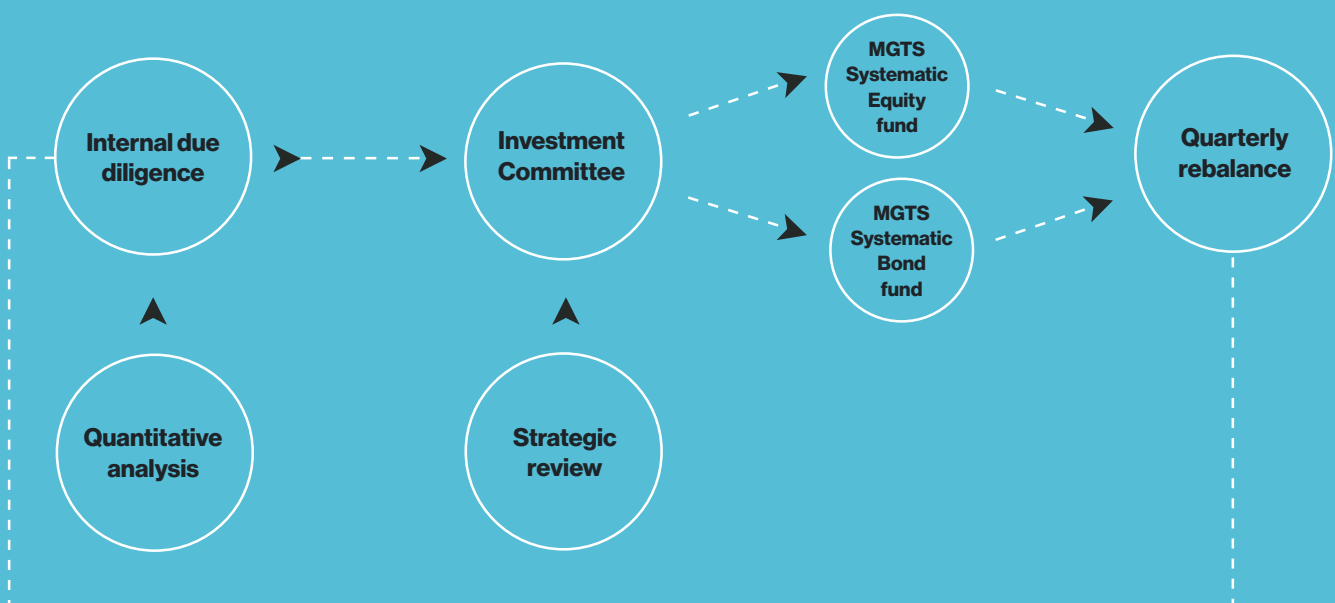

A quantitative process is at the heart of what we do. Not only does it filter the investment world down to a manageable level of choices but also strips out any emotional bias.

Our investment research covers all major asset classes, spanning all regions of the world and we seek funds with the underlying principles of balancing risk, reward and cost.

We recognise that minimising costs in the client's investment programme can have significant benefits, especially given the multiplying effects of compounding. A pound of costs saved is no different to a pound of market performance in monetary terms, yet it is more valuable due to its consistency over time and being achieved without taking any risk.

One of the key benefits of our investment approach is that we're able to leverage our buying power to provide funds at a fair value, which is lower than similar products in the market. Our Managed Portfolio Service (MPS) portfolios are rebalanced quarterly to support consistency of performance and to keep in line with investors attitude to risk.

Robust, repeatable investment process

The Tempo Portfolio Range

This section illustrates the asset allocation of each model

The value of investments and any income from them can fall as well as rise and you may get back less than you invested. Past performance is not a guide to future performance. No investment is suitable in all cases and if you have any doubts as to an investment's suitability, then you should contact a professional adviser. If you invest in currencies other than your own, fluctuations in currency value will mean that the value of your investment will move independently of the underlying assets, thus increasing the risks.

Tempo 30

Profile

The majority of the portfolio is allocated to high-quality and investment grade bonds. Over the medium to longer-term, the 30% exposure to the risks and expected rewards of equity ownership should help to maintain purchasing power.

*Percentages are subject to roundings

Tempo 40

Progeny

Progeny is a trading style of Progeny Asset Management Limited and is used by various companies within the Progeny group of companies. Progeny Asset Management Limited is a limited company registered in England and Wales with number 09415365. The company's registered address is 1A Tower Square, Leeds, LS1 4DL. Progeny Asset Management Limited is authorised and regulated by the Financial Conduct Authority (No. 740528). VAT Number: 238579267.

This document is for educational purposes only and should not be used to make a decision about the suitability or otherwise of a specific investment strategy. No investment is suitable in all cases and if you have any doubts as to an investment's suitability, then you should contact a professional adviser and always read any attaching Prospectus or Key Investor Information Documents, both of which are available upon request.

Past performance is not a guide to future performance. The value of investments and any income from them can fall as well as rise and you may get back less than you invested. Exposure to various asset classes may include some assets that are considered to carry more risk. This means that the rise and fall in value could be greater than for lower risk investments or may take longer to sell. In addition, the way in which these assets interact with each other may change through time causing higher or lower fluctuations of value. If you invest in currencies other than your own, fluctuations in currency value will mean that the value of your investment will move independently of the underlying assets, which could add to the rise and fall in the value of investments. The underlying collective investment schemes may also experience operational or credit issues, which could impact liquidity (the ability to sell) or capital value. Your capital is therefore always at risk.

The information contained within this document is subject to the UK regulation, legislation and tax regime, which is subject to change at any time. This document is therefore primarily targeted at consumers based in the UK.
