## MGTS Progeny ProFolio Model 70-90% Shares Fund

### INVESTMENT OBJECTIVE AND POLICY

The objective of the Sub-fund is to provide capital growth, with the potential for income, over any 6-year period. This Sub-fund provides exposure to shares that can vary between 70% and 90%. Exposure to shares may be to any economic sector or geographical area. It is expected that under normal circumstances that UK shares will represent a greater proportion of the shares than the UK stock market's proportion of the global stock market (e.g. FTSE World).

The Sub-fund may also provide exposure to alternative asset classes, such as property and commodities, which are intended to improve the overall risk reward profile of the Sub-fund. Exposure to alternative asset classes will be limited to 30%. The balance of exposure will be to bonds and cash.

Exposure to bonds may be to any economic sector or geographical area. It is expected under normal circumstances that the majority of exposure will be held in UK bonds or in bonds where the currency exposure is hedged to GBP.

Exposure to cash will vary depending upon prevailing circumstances and although it would normally not exceed 10% of the total value of the Sub-fund, there may be times when a higher level of liquidity may be maintained.

To provide the above exposure, a minimum of 70% of the Sub-fund will be invested in active and/or passively managed collective investment schemes. The Sub-fund may also invest directly (maximum of 30%) in transferable securities, such as shares, bonds, investment trusts or structured products.
