

### Risk Profile Description

The portfolio aims to have 60% exposure to equity and property assets and 40% exposure to Fixed Interest securities. Over the medium to longer term, the 60% exposure to risks and expected rewards of equity ownership should help to deliver moderate, inflation-plus returns. The equity exposure is invested in both UK equities and overseas equity in both developed and emerging markets. The equity risk is balanced by a 40% allocation to high-quality bonds and investment grade.

## Portfolio Comments

As the Tempo portfolios are constructed using a combination of index-tracking and multi-factor funds, the monthly portfolio movements are best summarized using the following summary.

October saw the return of volatility to global financial markets at levels not seen since Q1 this year. COVID-19 cases started to spike across Europe and America with most major European countries announcing further lockdown measures, with England announcing a full 4-week lockdown. In contrast Asia has managed to more effectively stop the spread of the virus with only small pockets of outbreaks emerging.

On top of the increased COVID-19 cases, the US election approached and caused increased volatility around the expected outcome. As the polls suggested a Biden win and Democratic clean sweep in the Senate and House, Technology stocks fell based upon concerns over Bidens policy of higher Corporation tax and its impact on profits.

In global equity markets, over the month the S&P 500 fell -4.35%, with the FTSE 100 down -5.05% and European markets down -7.14%. The greater fall in Europe was due to the fears of an extended lockdown and what the likely outcome for businesses would be.

Moving to defensive assets, October movements in fixed interest markets were mixed. The yields on US treasuries increased from 0.68% to 0.88%, as a Biden clean sweep increased expectation of inflation and therefore quicker interest rate rises. In Europe, bond yields fell as investors moved to safe haven assets with the worsening state of the pandemic.
