

INVESTMENT POLICY

A systematic approach is used to provide exposure to a range of global bonds across any economic sector and geographic area. The systematic approach is defined as using a methodical rule-based investment process to create the asset allocation and underlying investment selections.

To provide the above exposure, a minimum of 70% of the Sub-fund will be invested in active and/or passively managed collective investment schemes (which may include schemes operated by the ACD, associates or controllers of the ACD). The Sub-fund may also invest directly (maximum of 30%) in transferable securities, such as bonds.

Overall exposure to Sterling Denominated (or hedged back to Sterling) bonds, either held directly or indirectly through other assets such as collective investment schemes, will be a minimum of 80%.

The Sub-fund will be fully invested except for a cash amount to enable ready settlement of liabilities (including redemption of units) and efficient management of the Sub-fund both generally and in relation to its investment objective. This amount will vary depending upon prevailing circumstances and would not normally exceed 10% of the total value of the Sub-fund.

Eligible expenses will be charged to the Sub-fund's capital account. This will increase the distributable income by that amount and reduce the capital by a similar amount. This may constrain capital growth.

OBJECTIVE

The objective of the Sub-fund is to provide income.

PERFORMANCE

The IA (Investment Association) Sterling Strategic Bond Sector is used as the comparator. This is considered appropriate for investors to use when comparing performance as the sector is made up of funds with a similar asset allocation as defined by the IA. The sector is not constructed as an Index, therefore as funds enter or leave the sector composition can change, but it is considered that the sector remains a useful and relevant comparator for investors to assess performance within a relevant peer group.
