CONNECTED FINANCIAL THINKING

Investment Policy

A systematic approach is used to provide exposure to a range of asset classes across any economic sector and geographic area with a typical exposure to shares and/or property of about 40%. Property exposure will typically be less than 10%. A systematic approach is defined as using a methodical rule-based investment process to create the asset allocation and underlying investment selections.

The balance of exposure will be to bonds (which may include government, corporate, sub-investment grade and inflation linked) and cash.

Where typical exposures are stated above, they provide a general expectation of the allocation. In the short-term (a period of less than one year), the allocation may deviate above or below the stated typical allocation by 5% of the Sub-fund's value.

To provide the above exposure, a minimum of 70% of the Sub-fund will be invested in active and/or passively managed collective investment schemes. The Sub-fund may also invest directly (maximum of 30%) in transferable securities, such as shares, bonds, investment trusts or structured products.

A look through of collective investment schemes and transferable securities will be used when calculating and monitoring adherence to the exposure limits set out above. This process involves considering the underlying exposure to allocate between asset classes.

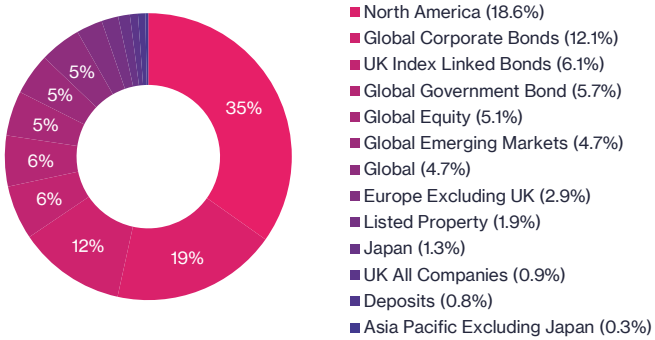

Objective

The objective of the Sub-fund is to provide capital growth, with the potential for income, over any 4-year period.

Performance

Investors can use the Investment Association (IA) Mixed Investment 20-60% Shares sector average as a comparator. The sector is considered appropriate as the asset allocation of the Sub-fund is similar to the asset allocation of other funds in this sector. The IA sector is not constructed as an index, therefore as funds enter or leave the sector composition can change.
