

CONNECTED FINANCIAL THINKING

Investment Policy

This Sub-fund provides exposure to shares that can vary between 50% and 70%. Exposure to shares may be to any economic sector or geographical area.

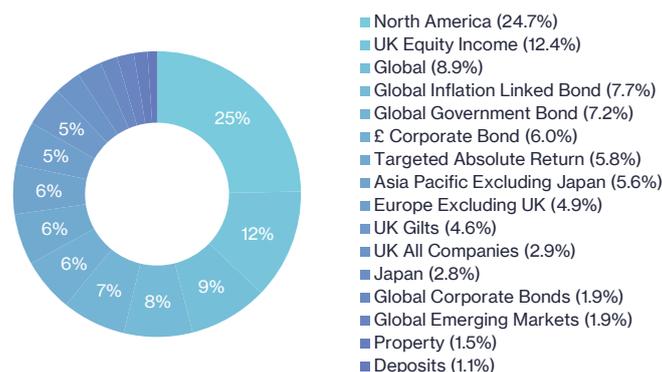

The Sub-fund may also provide exposure to alternative asset classes, such as property, which are intended to improve the overall distributable income or risk reward profile of the Sub-fund. Exposure to alternative asset classes will be limited to 30%.

The balance of exposure will be to bonds (which may include government, corporate, sub-investment grade and inflation linked) in any economic sector or geographical area and cash.

To provide the above exposure, a minimum of 70% of the Sub-fund will be invested in active and/or passively managed collective investment schemes. The Sub-fund may also invest directly (maximum of 30%) in transferable securities, such as shares, bonds or investment trusts.

The ACD has agreed with the Depositary it will charge up to 100% of the annual management fee to the Sub-fund's capital account. This will increase the distributable income by that amount and reduce the capital by a similar amount and may constrain capital growth.

Sector Allocation

Objective

The objective of the Sub-fund is to provide income, with the potential for capital growth over any 5-year period.

Performance

The IA (Investment Association) 40-85% Share Sector can be used as a comparator. The sector is considered appropriate for investors to use when comparing performance, as the asset allocation of the Sub-fund is similar to the asset allocation of other funds in this sector. The sector is not constructed as index, therefore as funds enter or leave the sector the composition can change.
